How do I know if a solar salesperson is fraudulent?

Select one of our top three recommendations from the panel below to get started on your solar journey safely: High-pressure sales tactics, exaggerated promises and claims of "free" solar panels are three major red flags to look out for when determining if a solar salesperson is fraudulent or misleading.

How do I avoid solar panel scams?

Knowing about solar scams and what to look out for can help you protect your assets and prevent you from becoming victimized. To avoid solar panel scams, we strongly recommend doing your own research and verifying that your solar company is legitimate before signing any contracts. Take time to make the right decision: Never rush into a contract.

Is my solar panel installer going out of business?

If you're not sure whether your solar panel installer has gone out of business, and a cold caller is insisting they are taking over, don't take their word for it. In this instance, it turned out to be a scam. Instead, check your original installer's website and try the contact details you were given when your panels were installed.

Are 'fake' solar companies a scam?

Beware of any company asking you to make a big deposit before they have completed their installation. This is one of the most common ways 'fake' solar companies have targeted consumers - whereby they take a hefty deposit and then never turn up to carry out the installation. This is common solar scam.

For solar panels, the most important specs to watch are: Efficiency: How well a solar panel captures sunlight and converts it into electricity for your home, expressed as a percentage (i.e., 22.2%).
