

Automatic welding machine for photovoltaic bracket accessories

The solar photovoltaic automatic string welding machine adopts infrared roller hybrid welding technology, which can fully automatically weld traditional and double-sided batteries, as well as sliced small batteries. It is compatible with various welding modes such as 3BB and multiple main grids, with low mechanical stress, low damage rate, and easy maintenance.

Request PDF | A Smart Monitoring System for Automatic Welding Defect Detection | This work introduces an intelligent system able to perform quality control assessment in an industrial production line.
