

Can steel lockers be placed in the bathroom

What equipment do I need for a locker installation?

For your locker installation, you will need a spirit level, spanner, drill and handling equipment. Fixings, nesting nuts and bolts will be provided. Ideally, two people are required to do an installation especially if the lockers are front heavy such as glass or laminate lockers. Suitable PPE may be required for safety reasons.

How do I choose a locker?

You also need to consider the position of any windows or doors. Make sure your lockers will not block access to any windows or doors which still need to be opened. Take note of things like skirting boards, radiators, heating pipes, light switches, and sockets etc. Make sure you install on a strong, level and even surface, are the floors level?

How do you secure a locker?

A single run of lockers must be secured to a suitable anchor point with a suitable bracing mechanism. Lockers on stands or seat/stands should be fixed down to the stand or seat/stand as well as side to side and back to a wall or run of lockers.

How do you maintain a locker?

It is really important that lockers placed back to back are bolted together securely because the lockers industry has had fatalities in the past. Cleaning lockers is easy; simply use a duster or soft cloth. It is recommended that all locks and hinges are regularly maintained with a suitable lubricant.

Can a locker be fixed to a wall?

Most lockers are tall and thin, depending on your requirements and specifications but they could be unstable if they are not fixed to the wall or each other. A single run of lockers must be secured to a suitable anchor point with a suitable bracing mechanism.

How many people do I need to install a locker?

Ideally, two people are required to do an installation especially if the lockers are front heavy such as glass or laminate lockers. Suitable PPE may be required for safety reasons. When and if offloading the lockers, do it front faced as they are heavy and could tip over and get damaged.
