The Best Solar Chargers for 2024. Our gear experts have been testing solar panels for well over a decade. We've tested well over 100 different portable solar chargers and best solar panels for camping to help you find the ...

Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.
