Project Phases: The project will be implemented in two phases, with the first phase deploying 250MW of solar panels to inject new vitality into Iraq's power system. Clean Energy Target: Iraq aims to achieve 5GW of solar power generation by 2023, with China Electric Power Engineering's project playing a pivotal role in meeting this target.

García Herrero says that by the end of the 2010s, the EU was home to around 60% of global solar panel production. To spur production, European countries - especially Germany and Spain - had been heavily subsidising the use of solar energy by individuals. But because of the financial crisis, European countries lifted solar energy subsidies.
