

Colored clay installation of solar photovoltaic panels

Can you put solar panels on a clay tile roof?

Clay tile roofs can be heavy. Solar panels will add weight to the structure. Consult with a professional to ensure your roof can safely support added load. Next, think about how you'll attach panels. Traditional racking systems may not work well on clay tiles. Many installers use tile hooks to secure the panels.

How to install solar panels on a roof?

You'll need sturdy brackets and hardware to mount the racks. Make sure to fasten them securely to the roof structure. Another option is the inset or comp-out method. This involves removing some tiles and placing the solar panels flush with the roof.

What are coloured solar panels?

With this in mind, more companies are considering the design of their panels and this has led to the introduction of coloured solar panels. Designed to blend in with the colour of your roof (or stand out in some cases) the panels function in the same way as traditional modules but are a more aesthetically pleasing alternative.

Why do solar panels come in different colours?

The main reason for using different colour solar panels is to make an installation blend with the roof it is mounted on. This means browns, reds and greys are a popular choice although more vibrant colours like pink and green also exist in the market.

How do I choose a solar panel for my home?

To optimize solar energy production, panels must be positioned at an optimal angle. Roof pitch with clay tiles can vary, so make sure your installer is aware of this. Lastly, consider aesthetics. Solar panels should blend seamlessly with your roof to maintain your home's look. A variety of panel designs are available for this purpose.

Are coloured solar panels popular in the UK?

This means browns, reds and greys are a popular choice although more vibrant colours like pink and green also exist in the market. Whilst coloured solar panels are not widely encountered in the UK yet, they have taken off in America and parts of Europe where coloured roof tiles are more commonly seen. Do coloured solar panels cost more?
