

Eaves solar surveillance camera bracket

How high should a security camera be under eaves?

Eight to ten feet is the ideal height for outdoor security cameras. You now know how to install cameras under eaves. The process might seem intimidating, but the steps are straightforward. Of course, you can always hire a professional to set up a home security camera under the eaves.

How do you install a security camera eave?

Measure the eave's width or depth from the outer edge (below the fascia) to the wall section to approximate aluminum strip length for mounting the camera bracket. Go to the attic and use the sketch as a guide in measuring the wiring route. Grab the security camera wire and determine its length, ensuring it covers the cabling route.

How to install a security camera bracket?

Get the aluminum strip and drill holes for mounting the security camera bracket. If color matching, paint the metal strip with a color identical to the soffit and wait for it to dry before proceeding. Secure the bracket to the metal strip using screws. Use a splicer to prepare the Ethernet cable wires for the Ethernet jacks.

Can you attach a security camera to a soffit?

Yes, you can attach a security camera to the soffit. However, we recommend checking installation instructions and determining soffit mounting suitability. You can use an under soffit camera mount for the installation. How do you hide exterior security camera wires?
