

# Energy storage cabinet locking system

What is energy storage system?

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, commercial areas, housing communities, micro-grids, solar farms, and more.

What are the applications of energy storage system?

All-in-one, high-performance energy storage system for various industrial and commercial applications. Highly suitable for all kinds of outdoor applications such as EV charging stations, industrial parks, commercial areas, housing communities, micro-grids, solar farms, peak shaving, demand charge management, grid expansion and more.

What is a multi-cam locking system?

Multi-Cam Locking Systems are always installed within the door's surrounding sealing profile. With this system, doors and flaps of large control cabinets or other enclosures can be opened and closed quickly and easily, even in areas that are difficult to access. What are the types of Multi-Cam Locking Systems?

What is a LiHub energy storage system?

The LiHub has a standard one-cabinet-one-system design, each system is completely independently controlled. Multiple cabinets can be connected in parallel to expand the size of the energy storage system, enabling flexible configurations. All-in-one, high-performance energy storage system for various industrial and commercial applications.

What is LiHub all-in-one energy storage system?

LiHub All-in-One Industrial and Commercial Energy Storage System is a beautifully designed, turn-key solution energy storage system. Within the IP54 protected cabinet consists of built-in energy storage batteries, PCS inverter, BMS, air-conditioning units, and double layer fire protection system.

How does a door lock work?

Additional compression The locking points with compression function pull the door securely and smoothly into the surrounding door sealing with additional compression of 4mm for 90°; closing or 4.5mm for 180°; closing. Even with high sealing pressure, your door closes dust and splash-proof according to IP65.

When the RFID reader scans the tag, it identifies whether the user is authorized to unlock the cabinet. If the system recognizes the RFID tag as valid, the lock disengages, allowing access. If the tag is unrecognized, the lock remains secure. This system is not only efficient but also reduces the risks associated with lost or duplicated keys.
