

Energy storage container equipment rental

How long can I rent a battery energy storage system?

Rental periods can vary from a few weeks to even years. With no upfront cost and competitive rental fees, we guarantee that our battery energy storage systems deliver 24/7 round-the-clock reliability and 100% peace of mind.

What are battery energy storage systems (BESS) containers?

Battery Energy Storage Systems (BESS) containers are revolutionizing how we store and manage energy from renewable sources such as solar and wind power. Known for their modularity and cost-effectiveness, BESS containers are not just about storing energy; they bring a plethora of functionalities essential for modern energy management. 1.

What are battery energy storage systems?

This data is used for system optimization, maintenance planning, and regulatory compliance. Battery Energy Storage Systems play a pivotal role across various business sectors in the UK, from commercial to utility-scale applications, each addressing specific energy needs and challenges.

What is a fully integrated battery storage system?

Our fully integrated battery storage is a ready-to-install energy system in a standard container. Complete with batteries, inverter, HVAC, fire protection and auxiliary components, all tested by our experts and operated by the smartest software on the market. Single units can be easily combined to deliver more power and energy capacity.

How can a battery storage solution help your business?

Our battery storage solutions can help to power your operations, while reducing fuel costs and cutting carbon emissions more than ever before. Whether you want to power a microgrid, add reliability to a hybrid system or simply optimise your business case through smart energy management, we have simple solutions.

What is a battery container?

Battery containers are not only a great solution for backup emergency power needs, they are a key component in hybrid applications and the green revolution. When used with solar power generation, BESS containers provide power at night or during heavy cloud cover.
