

How much electricity does a balcony solar system generate in Germany?

*Data based on average user scenarios of a balcony solar system in Germany. The annual power generation of Anker SOLIX RS40P is 890kWh; the annual power generation of an alternative balcony solar system is 757kWh. The electricity price was EURO.40/kWh in August 2023.

What is a balcony power storage system?

Balcony Power Storage System increases solar power efficiency and reduces electricity consumption from the grid. Nearly all of that solar power generated during the day goes to your home or is stored for later use. And with a plug-and-play setup and a wide range of functions, you can relax while powering your home with sustainable energy.

Can Anker solar balcony be installed in Germany?

Only Germany regulates the size of solar panels on rooftops. One solar panel must be less than 2m². Austria has no size limitation. Can my home support Anker SOLIX Solar Balcony? As long as your home has enough sun exposure and space, you can install the system.

Can I install a solar balcony system?

As long as your home has enough sun exposure and space, you can install the system. Before purchasing, check the latest local regulations and your energy supplier regarding restrictions on solar balcony systems. How does Solarbank work? Solarbank connects a solar (photovoltaic) module to a microinverter.

What is the self-consumption rate of a balcony Solar System?

The self-consumption rate of an industry-average balcony solar system by itself is 40%; the self-consumption rate of a balcony solar system with 1kWh storage is 73%; the self-consumption rate of Anker SOLIX Balcony Power Storage System is 90%. Make power easy to understand with the Anker app.
