Who is China Southern Power Grid co?

In accordance with a State Council rule on electric power system reform, China Southern Power Grid Co was officially launched and put into operation on Dec 29, 2002. It is a centrally-administered company, with the State-owned Assets Supervision and Administration Commission of the State Council (SASAC) performing duties as its investor.

What is a southern power grid?

Southern power grids extend approximately 2,000 kilometers from east to west, covering a variety of sources for power generation, including water, coal, nuclear, pumped storage, oil, gas and wind.

What is a green power certificate?

Green power certificates act as electronic IDs for green power transactions. Due to the homogeneity of electricity, once it enters the grid for transmission, its attributes cannot be distinguished by the grid or consumers. Only the generation side can differentiate it using green certificates.

How does Guangxi get its power?

In Guangxi, all the wind and solar power is taken by the grid through guaranteed purchases but its hydropower stations are getting access to the grid through a "generation rights trading" mechanism, where they buy their generation quota from other power plants, mostly coal-fired ones.

How many Green Power Certificates have been traded?

Some 24.82 million green power certificates have been traded in the last week of June on the Guangzhou Power Exchange Center.
