What is a wind turbine generator?

What is a wind turbine? A wind turbine, or wind generator or wind turbine generator, is a device that converts the kinetic energy of wind (a natural and renewable source) into electricity. Whereas a ventilator or fan uses electricity to create wind, a wind turbine does the opposite: it harnesses the wind to make electricity.

How to set up a wind turbine generator with a grid tie inverter?

For this setup, the generator of the wind turbine needs to have the right output voltage for the grid tie inverter, so it is a good idea to know which inverter will be used in advance and make the generator windings in a way to fit the inverter's needs.

Can a wind grid-tie inverter feed power into a 230v/50hz mains level system?

AC-coupling via a wind grid-tie inverter is also possible to feed power into a 230V/50Hz mains level system. We are basically free to choose the operating voltage range for the turbines by adapting the generator coil windings to our needs with the right calculations.

Low voltage stand alone wind power systems are great for wind charging batteries etc, but if we want to power larger mains connected appliances or have a system that is "grid-tied" we need to either use some form of inverter to change the low voltage DC generated by the permanent magnet DC generator into a higher voltage (120 or 240 volts) AC supply, or ...

How Wind Turbine Generators Work. The fundamental principle behind wind turbine generators is relatively simple and consists of four primary steps. First, when the wind blows, it applies a force to the turbine blades. This force makes the blades rotate around a rotor, which is connected to the main shaft.

A DC wind generator system has a wind turbine, a DC generator, an insulated gate bipolar transistor (IGBT) inverter, a transformer, a controller, and a power grid. For shunt-wound DC generators, the field current increases with operational speed, whereas the balance between the wind turbine drive torque determines the actual speed of the wind turbine.
