specific geometrical structure to improve energy efficiency by 35%.

The site is north of Winnipeg, north of the Canadian border with Minnesota. The site will make "ultra high-clarity pattern solar glass" with high-purity, low-iron silica sand from Canadian quarries owned by CPS. The Manitoba site will use local hydroelectricity to eventually produce 6 GW of solar glass annually.

SolarCycle currently operates facilities in Odessa, Texas, and Mesa, Arizona, and has inked long-term partnerships with more than 40 of the nation's largest solar energy companies to reuse and recycle their solar panels, including Georgia-based solar manufacturer Qcells. The company's advanced, proprietary recycling technology allows it to extract 95% of ...
