

GoodWe PV Inverter QR Code

How does a goodwe inverter work?

In addition to changing the LED status indicators, GoodWe inverters generate alarms and errors messages, and displays them in the SolarGo App and SEMS Portal. SolarGo App is one smart phone application used to communicate with the inverter via bluetooth, WiFi, 4G or GPRS modules. Commonly used functions: Maintain the equipment.

How to check the status of a goodwe inverter?

Highlight and supplement the texts. Or some skills and methods to solve product-related problems to save time. The latest document contains all the updates made in earlier issues. For most errors, GoodWe inverters display a status using the LED indicators on the cover of the inverter. Step 1: As a first step, always check the LED indicators.

How to update firmware of goodwe hybrid inverters?

There are 2 methods to update firmware of GoodWe hybrid inverters. Only for ES, ES G2 and ET PLUS+ Series inverters. The upgrade patch has been obtained from the dealer or the after sales service. Duplicate the upgrade patch to the smart phone for the Android system. Step 1: Connect the bluetooth module into the USB port of the inverter.

Do goodwe inverters support a power limit function?

GoodWe inverters support both output and export power limit function. Installers can limit the inverter output to meet some special requirements. For example, many Australian homes are not allowed to export more than 5 kW to the grid. Therefore, the output limit is necessary for the system with an inverter larger than 5kW.

Does goodwe offer solar go?

GoodWe offers mobile software Solar Go for easy commissioning, including choosing grid code, changing grid parameters, firmware upgrade and other setting options. In Solar Go, the setting options are divided into two parts, basic setting and advanced setting.

Which inverters can use solargo app?

SolarGo App applies to DNS, SDT G2, MT G2, SMT, HT series inverters. Mobile phone operating system: Android 4.3 or later, iOS 9.0 or later. The mobile phone can access the Internet. The mobile phone supports WLAN or Bluetooth. After installing the app, it can automatically prompt users to update the app version.

I am reading that the day consumption of the inverter should be around 10-30 watts. Not hundreds of watts. During night it should be even less. Like up to 5 watts because the inverter is laterally doing nothing. It should not be difficult to program a inverter to recognize when it is night time and go to sleep mode. Really frustrated.

Scan the QR Code on the equipment if you need to use 4G or GPRS. * are the last 8 digits of the inverter SN. Password: Bluetooth: 1234 Wifi: 1234 4G: Automatically filled in Initial Password ...
