

Hanergy Solar Power Stock Forum

Hanergy Holding Group Ltd. (Hanergy) is a Chinese multinational company headquartered in Beijing. The company is focusing on thin-film solar value chain, including manufacturing and solar parks development. It also owns the Jinanqiao Hydroelectric Power Station [2] [3] [4] and two wind farms. Hanergy is founded and controlled by Li Hejun.

Hanergy named the four prototype cars Solar O, Solar L, Solar A and a racing car type Solar R. Each car will target a different market. Unlike almost all purely electric cars in the market, Hanergy solar cars do not need regular plug-in charging since the thin-film GaAs double-junction solar cells on the cars' surfaces will convert PV power to electricity.

The HANERGY Thin Film Solar Backpack is an innovative and practical solution for anyone who wants to stay connected while on the go. With its unique solar panel design, this backpack can convert sunlight into electricity, providing a reliable and sustainable power source for charging your devices.
