

Home solar generator direct sales

What is a solar generator?

...A Solar generator is of course a generator powered by solar power. These portable generators are powered by capturing energy power from the sun storing that power in a battery to be used mainly as a back-up. Popular uses are when camping, on boats at home and in the garden.

Where can I find a solar generator?

Discover our collection of solar generators at [Anker.com](https://www.anker.com) for endless power at home or away.

Will a portable generator power my home?

Remember, no portable generator will power your home but some solar generators can power some key appliances in your home during an emergency. The most important thing when buying a solar powered generator is the battery capacity, that is how much energy the battery will hold.

Can You Power Your House with a solar generator?

You could, in theory, power your house with a solar generator, but its capacity must match your household's energy needs. Larger solar generators, coupled with enough battery storage, can handle multiple appliances and systems. However, if you want constant power for your whole house, a complete solar panel system is usually your best bet.

How does a solar generator work?

It captures and stores the sun's energy, which is converted by an inverter from DC to AC to power a variety of appliances or home loads. EcoFlow solar generators are an extensive range of diverse solar panels paired with iconic EcoFlow power stations sporting 256Wh to 7200Wh capacities.

Are solar-powered generators a good idea?

With all the environmental issues the world continues to face, going solar is becoming a must. And solar-powered generators are just one of many new kinds of solar technology that can help cut emissions and costs. They are a lifesaver for portable power- whether that's for an off-road adventure or to reduce your reliance on the grid.

EcoFlow's 220W Bifacial Portable Solar Panel is two in one. With a 220W primary side, and a 155W side on the back for ambient light, you can capture up to 25% more solar energy and charge your portable power station even faster. Try a mirrored surface and you can get up to 80% more energy. [...]
