How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you Mount flexible solar panels?

The same principle applies here! There are two main methods of mounting flexible solar panels: peel-and-stick adhesive and screw-in. While screw-in provides more security, it risks damaging the panels if not done correctly. Consider the surface you're mounting the panels on and the environment in which they'll be operating.
