The cost of energy storage systems is one of main factors that determine whether storage systems can be used in industrial applications or not (Chen et al., 2019). Rock-bed storage systems are defined as a cheap way to store thermal energy (Allen et al., 2014, Barton, 2013, Becattini et al., 2017, Hänchen et al., 2011, Heller and Gauche, 2013, Jemmal ...

The representative utility-scale system (UPV) for 2024 has a rating of 100 MW dc (the sum of the system's module ratings). Each module has an area (with frame) of 2.57 m² and a rated power of 530 watts, corresponding to an efficiency of 20.6%. The bifacial modules were produced in Southeast Asia in a plant producing 1.5 GW dc per year, using crystalline silicon solar cells ...
