

Infrastructure Photovoltaic s stock price has been on the rise for 8 consecutive days

Are solar energy stocks a good investment in 2023?

To skip the detailed overview of the solar industry, go directly to the 5 Most Promising Solar Stocks According to Analysts. Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively.

How will the solar PV industry grow in 2021?

The solar PV industry has witnessed remarkable growth, driven by technological advancements, government incentives, and increased awareness of solar energy's environmental benefits. According to recent data, the solar PV market is projected to grow at a compound annual growth rate of over 20% between 2021 and 2026.

What is the future of solar energy?

The growth of solar energy is expected to continue, with some projections estimating that global solar installations could reach 4.7 terawatts by 2050. The statistics surrounding the solar PV industry are awe-inspiring. Solar PV installations have also substantially reduced greenhouse gas emissions.

Should you buy solar energy stocks in 2022?

Although higher gas and oil price spikes made solar stocks rally in 2022, as energy prices retreated in 2023, enthusiasm for renewables has temporarily dampened. Still, investors who want to capitalize on the renewable energy trend, should begin looking now into the best solar energy stocks in the market.

Why did solar stocks shine as bright in the past 12 months?

Solar stocks shined as bright in the past 12 months despite a continuing shift to renewable energy and lucrative government incentives to install solar infrastructure. Disrupted supply chains, rising interest rates, and policy uncertainty have been among the challenges solar faces.

Are solar PV systems a good investment?

The statistics surrounding the solar PV industry are awe-inspiring. Solar PV installations have also substantially reduced greenhouse gas emissions. According to the International Energy Agency, solar PV systems installed in 2020 alone helped to avoid approximately 2.6 billion tonnes of carbon dioxide emissions.

NAV per share dipped 2.4p or 1.8% over the six-month period as a rise in inflation that added 3.5p to the valuation was more than offset by a rise in discount rates, which knocked off 5.7p, and a fall in power prices which reduced NAV by 3.5p per share.
