I mean, I also have a brushless motor who can work at 96V and deliver twice the power that at 48V... but I still plan a 48V battery because of available MPPT and inverters. Well, 96V MPPT seem to exist and 96V to 12V DC-DC are available. So a system with a large 96V battery and a small 12V battery+12V inverter seem workable.
