

# Is home solar power cheap

Should you buy cheap solar panels?

Opt for cheap solar panels if you have a tight budget and your household energy consumption is relatively low. Solar panels for homes have become a symbol of eco-conscious living, but the initial cost can be a real hurdle. Yet the good news is that cheap solar panels are a reality for homeowners.

Are solar panels worth it?

The investment in solar panels is worth it for the average UK home. For example, the typical 3-bedroom house in the UK is equipped with a 4kW solar panel system, enabling homeowners to potentially save around £600 annually on electricity expenses.

Why should you choose cheaper solar panels?

**Savings on Initial Investment:** One of the main advantages of choosing cheaper solar panels is the lower upfront cost required. Affordable solar panels can be a more accessible option for homeowners who want to switch to clean energy without spending too much money.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

Can you save money on solar panels?

Another option for solar panel funding is the new VAT reduction on energy-saving products, such as PV panels. This means that, until March 2027, you'll pay 0% on VAT to help homeowners transition to renewable energy. The average household could potentially see up to tax savings worth £2,850.
