

# Is it easy to get money for photovoltaic panel installation

How much does a solar panel installation cost?

Generally, two installers will work together to install your solar panel system, and depending on its complexity, they can take up to 3 days to complete the installation. This means that you can expect to spend anywhere between \$600 and \$3,000 on labour costs alone.

Do you need solar panel financing?

However, the cost of installation can be a barrier for many homeowners, which is where solar panel financing comes in. There are several types of financing options available, including solar loans, leases, and power purchase agreements.

How do I finance a solar panel?

One of the most popular options for solar panel financing is a loan. With a solar loan, you borrow money from a lender to pay for the installation of your solar panels. The loan is typically repaid over a period of several years, and interest rates and terms can vary depending on the lender.

Should you buy a solar PV system?

If you have the capital, the smart way to get solar is to pay for it outright. Buying your solar PV system upfront means you can recoup the cost from the start. This offers a better ROI than leaving the money in the bank. If you don't have the cash to hand, however, it's worth considering a loan.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around \$1,000 - \$1,500, whereas polycrystalline solar panels cost about \$900 per kW.

Harnessing the sun's power is a brilliant way to reduce electricity bills, shrink carbon footprint, and become more energy-independent.
