

Is it good to rent out the roof and install photovoltaic panels

Are solar panels paying rent for your roof?

Technically, they're not paying rent for your roof, because you'll get the benefit of powering your home using solar power instead of grid electricity. They'll make money from the electricity you don't use. All excess electricity generated is sold back to the grid via the Smart Export Guarantee (SEG) scheme.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will set up solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

Can you buy a house with rent-a-roof solar panels?

Buying a house with Rent-a-Roof solar panels could lead to mortgage complications. For example, if the lease includes maintenance cost obligations, or if there are certain access rights granted to the installer, a mortgage provider could be unwilling to lend.

Can you get free solar panels on your roof?

Thanks to rising energy prices, more and more people are looking to invest in solar energy as a way of saving money and reducing their energy bills, making the prospect of free solar all the more tempting. Known as the "rent-a-roof" scheme, a growing number of companies are offering to fit and maintain solar panels on your roof for free.

How do I rent solar panels?

You RENT the solar panels for a fixed period by signing a roof lease agreement. If you rent or lease solar panels from a third party, you'll be required to sign a roof lease so that ownership of the solar panels doesn't pass to you once they're installed.

Do you need a roof lease for solar panels?

If you rent or lease solar panels from a third party, you'll be required to sign a roof lease so that ownership of the solar panels doesn't pass to you once they're installed. This is because in English property law, unless a roof lease is in place, ownership of the panels would automatically pass to the property owner once installed.

A 100KW system on a metal roof would typically take 6-8 working days from start to finish. Other roof types and system sizes will vary. We take every opportunity to limit the impact on a business whilst we install, and sites can stay open and operating throughout installation with only a short period of out of hours power loss.

Panels on a flat roof cast shade on each other, so you'll have to space them out - meaning you'll have to limit the number of panels you install. If you move ahead, make sure you stay within planning permission
