

Learn more about pure leasing photovoltaic panels

Should you lease solar panels?

There are five main advantages to leasing solar panels: Save money on electricity: the system will reduce how much energy you use from the grid when switched on. Low or no upfront costs: you don't have to buy the panels and other equipment upfront.

Is solar leasing a better option than a PPA?

In many ways, solar leasing presents a competitive option compared with a solar power purchase agreement (PPA).

What is solar leasing?

Solar leasing is a financing option through which customers pay a monthly fee for the panels and get to use the power the system produces. They do not, however, own the panels.

Should I buy or lease a solar system?

Finance subject to status. Both leasing and buying a photovoltaic system have certain advantages. Buying allows full ownership of the solar panel installation. Leasing a solar system, on the other hand, is a great option, especially for those who can't afford to buy a PV system outright.

Is solar leasing a good idea?

The beauty of solar leasing lies in its simplicity and financial flexibility. Solar leasing mirrors the familiarity of leasing a car but applies it to the solar panels on your roof. Initially requiring little to no down payment, it removes the financial barriers to solar installation.

Should you buy or lease a photovoltaic system?

Leasing a photovoltaic system offers an alternative to outright purchase, requiring no initial investment. Homeowners provide their roofs for the installation of a PV system and can use or sell any surplus energy generated. They pay a monthly fee covering installation and maintenance.
