What is a battery energy storage system (BESS) e-book?

This document e-book aims to give an overview of the full process to specify, select, manufacture, test, ship and install a Battery Energy Storage System (BESS). The content listed in this document comes from Sinovoltaics' own BESS project experience and industry best practices.

How to compare battery energy storage systems?

In terms of \$, that can be translated into \$/kWh, the main data to compare Battery Energy Storage Systems. Sinovoltaics' advice: after explaining the concept of usable capacity (see later), it's always wise to ask for a target price for the whole project in terms of \$/kWh and \$.

What is Mesa-device / sunspec energy storage model?

MESA has developed and manages two specifications: MESA-DER (formerly MESA-ESS) and MESA-Device/SunSpec Energy Storage Model . MESA-DER addresses communication between a utility's control system and distributed energy resources (DERs), including ESSs. MESA-Device specifies standardized communications between components within the ESS.

Is energy storage a future power grid?

For the past decade, industry, utilities, regulators, and the U.S. Department of Energy (DOE) have viewed energy storage as an important element of future power grids, and that as technology matures and costs decline, adoption will increase.

Does industry need energy storage standards?

As cited in the DOE OE ES Program Plan, "Industry requires specifications of standards for characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry professionals indicate a significant need for standards ..." [1, p. 30].

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- o Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- o Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.
