

New solar generator sales

What is a solar generator?

A solar generator uses solar panels to collect, convert and store sunlight as electricity in a portable power station. It is an ideal off-grid portable power solution.

Are solar generators worth it?

Whether solar generators are "worth it" mostly depends on what you need and what your situation is. As an environmentally friendly option that makes clean energy with no harmful emissions, they're particularly useful in remote areas without access to the power grid or during power outages.

What is a Growatt solar generator?

Growatt solar generator bundles typically include portable power stations with high-efficient solar panels. Such solar generator kits are ideal portable and sustainable power solution to give you clean solar energy, lower your carbon footprint, and reduce your reliance on the grid. [How Does A Solar Generator Work?](#)

Are solar-powered generators a good idea?

With all the environmental issues the world continues to face, going solar is becoming a must. And solar-powered generators are just one of many new kinds of solar technology that can help cut emissions and costs. They are a lifesaver for portable power- whether that's for an off-road adventure or to reduce your reliance on the grid.

How much does a solar generator cost?

The solar generators on this list span a wide range of budgets, from a few hundred dollars to a few thousand. They span several use cases, from camping to a backup for your home. Only you know all the factors that make one of these the best solar generator for you, but we think that one of these will get the job done.

Can You Power Your House with a solar generator?

You could, in theory, power your house with a solar generator, but its capacity must match your household's energy needs. Larger solar generators, coupled with enough battery storage, can handle multiple appliances and systems. However, if you want constant power for your whole house, a complete solar panel system is usually your best bet.

For solar charging, you need a special solar adapter cable that some manufacturers include in the solar generator kit. An average solar charging time is around 5 hours, but large generators like the Renogy Lycan 5000 and the Bluetti EP500 have a dual-charging mode which lets you charge from the grid and solar at the same time.

Available Tax Rebates: - You can receive up to a 30% tax rebate on 3kWh and larger Explorer portable power stations when purchasing a solar generator. - Eligible products include: Jackery Solar Generator 5000
