Are commercial solar panels right for your business?

Commercial solar panels can be beneficial regardless of whether your company is large or small. Most businesses are active in the daytime, which means they are the perfect candidates for utilising solar panels and enjoying the cost savings that come with them. Let's see if commercial solar panels will be right for you.

Does the UK offer government grants for solar panels on commercial buildings?

Currently, the United Kingdom does not offer government grants for solar panels on commercial buildings. On the other hand, the UK government has also applied 0% VAT on goods like solar panels and sustainable technologies which can save purchase costs immensely.

Can solar panels be installed on a commercial building?

By simply installing Solar PV panels, you can utilise your roof space on your commercial premises (eg. agricultural buildings, factories, warehouses, hospitals, schools etc) to generate electricity that is free to be used on site. [How Much Roof Space Do I Need For PV Panels? Minimum Requirements for a Good Return on your PV Installation](#)

How many solar panels does a small business need?

For an idea of scale: A 15kW system should, on average, contain enough solar panels for a small business in the UK, assuming they use up 39kWh to 60kWh per day. The average for small businesses in the UK, according to energy providers, is between 41kWh and 68kWh.

Are commercial solar panels a good investment?

Commercial solar panel installation can bring many benefits: Over the 25-year lifetime of solar panels, savings can equate to thousands of pounds. A 20kW system can potentially save businesses over £3,000 annually on their electricity bills. Solar panels allow for energy independence and some level of insulation from fluctuating electricity prices.
