In the great debate between choosing Solar Panels or Solar Thermal. Solar PV Panels are currently leading. This is because unlike Solar Thermal Panels, Solar PV can be used to generate green electricity as well as heating your water. This is done through installing an immersion diverter, such as the myenergi Eddi or iBoost. These Smart devices ...

Solar panel and battery packages work by capturing solar energy through the panels and converting it into electricity. Any excess energy generated is stored in the battery system. This stored energy can be used when solar production is low, such as during the night or on cloudy days, ensuring a continuous power supply and maximising the use of your solar energy.

Important - the standard delivery of the listed PV packages includes the following: Vitovolt 300 photovoltaic modules (allblack, 400 W p), ... We explain what distinguishes photovoltaics and solar thermal energy and how the two systems work. Read more. Power storage units increase self-consumption.
