What is a solar thermal power plant?

The neatly-arranged circular facilities seen in Hegen's images are solar thermal power plants,which focus sunlight from thousands of moving mirrors called heliostats onto a central collector tower.

What is the Solar Power Series?

The Solar Power Series is a collection of photographs of solar plants taken by Tom Hegen from a helicopter. The series showcases how solar technology is transforming the landscape in three countries. According to Hegen,"The Sun's energy would be enough to keep the world running for at least the next five million years.

Where are Hegen's solar projects located?

The locations seen in Hegen's project include the Ivanpah Solar Power Facility in California's Mojave Desert,the Crescent Dunes Solar Energy Project in Nevada,the Les Méses Solar Farm in France,the PS10 Solar Power Plant near Seville in Spain,and the Gemasolar Thermosolar Plant that's also near Seville,Spain.

What is a non-circular solar plant?

Non-circular solar plants are photovoltaic power stations(or solar farms),which use the same technology found on residential roofs. Photovoltaic modules are used to convert light directly into electricity. "Aerial photography,to me,is like data visualization for scientists," Hegen says in a 2022 interview with Fortune.

Could solar power keep the planet powered for generations to come?

According to Hegen,solar power has the potential to sustainably power the planet for generations,as in a single hour,the amount of power from the Sun that strikes the Earth is more than the entire world consumes in a year. My Modern Met features Hegen's mesmerizing aerial photos of enormous solar farms.
