In some coastal areas, because of the frequent hurricanes, the strength requirements for photovoltaic brackets are very strict, which requires PV bracket manufacturers to be able to design a sufficiently strong solar bracket system. However, the increase in strength is always accompanied by an increase in cost.

(about 10-35% lower than that of the flat photovoltaic power stations), poor quality of the power station bracket, complex structure and other shortcomings. Non-metallic bracket (flexible bracket) has a wide range of adaptability, flexibility of use, effective security and land perfect secondary use of economy, is a revolutionary creation of photovoltaic bracket.

And our main products are: Photovoltaic Bracket Accessories, Power Fittings and many kinds of stainless steel products and aluminum products, and our products also can be customized according to your requirements. ...
