How much does a solar inverter cost? If you're getting a standard string inverter for residential solar panels, the cost will typically range from \$500 to \$1,000, depending on the size of your system. Meanwhile, microinverters typically cost around \$100-150 per unit. Power optimisers typically cost \$40 each, but need an inverter costing around \$600 as well.

SolarEdge Technologies Ltd. is an Israel-based, global leader in smart energy technology. The company provides end-to-end distributed solar power optimization and PV system monitoring solutions with products and services that include PV inverter power optimizers, PV monitoring, software tools, and electric vehicle chargers.
