Which roof hooks are suitable for a tiled roof?

SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs. Side-mounted or landscape tile interfaces can be used to cater for special mounting needs. Roof hook extenders are also part of the range for installations on high corrugation tiles such as Spanish tiles

How do you install a roof hook?

To achieve this, you must cut a channel for the roof hook to sit in at the bottom of the upper tile. As you can see in the diagram above, the tiles are flush, and the upper tiles are grooved to make room for the roof hook. Grinding a channel for the roof hook on the back of a roof tile. How does the rail connect to the roof tiles and solar panels?

How do you install solar panels on a roof?

Usually, there is a clipping mechanism that is fastened with bolts. Bolts on solar mounting equipment come with nice utilities for single-tool fastening and do not require special spanners; a hex Allen key or a spanner is likely all you need. Roof rails ready for the installation of solar panels.

What makes solarroof a good roof hook?

Corrosion resistance is achieved through anodised structural grade aluminium and stainless steel components. The unique and innovative Z-module technology enables a surprisingly quick and easy installation. SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs.

How do roof hooks work?

Some roof hooks come with extra adjustments built-in. These allow you to control the protruding elements' depth and the angle at which the hook meets the rails. Such adjustments come in handy as on roofs, you're working with wide distances, and you have limited available points for installing the hooks.
