Photovoltaic Array The Solar Photovoltaic Array. If photovoltaic solar panels are made up of individual photovoltaic cells connected together, then the Solar Photovoltaic Array, also known simply as a Solar Array is a system made up of a group of solar panels connected together.. A photovoltaic array is therefore multiple solar panels electrically wired together to form a much ...

As the three PV cells are connected in series, the generated output current (I) will be the same (assuming the cells are evenly matched). The total output voltage, V_T will be the sum of all the individual cell voltages added together. That is: $V_1 + V_2 + V_3 = 0.5V + 0.5V + 0.5V = 1.5V$. Then the solar cell I-V characteristic curves of our three cells example are simply added together ...
