A typical 4kW solar panel system for 2-3 bedroom houses costs £5,000 - £6,000 with installation. Added together, the total cost of solar panels and a battery in the UK is £13,000 - £15,500. A 4kW system breaks even in 7 - 10 years, with annual electricity cost savings of between £440 and £1,005.

The best type of solar panel overall is monocrystalline, as it achieves the best peak power output, efficiency ratings, and break-even point, all while looking good. However, perovskite solar panels are coming for its crown. When they're widely available, they'll revolutionise the market - and your electricity bill savings.
