

What is a solar powered weeder Figure 4?

Sanjana(2019) had developed a solar operated portable power Weeder figure 4. The Weeder consists of solar panel,dc motor,gearbox and blades. The developed Weeder was directly powered with a solar panel. The solar panel was mounted overhead of Weeder. So,that the solar panel also works as a shadow for worker.

What is a solar powered weeder?

The power source used for operating Weeder was battery and solar photovoltaic system was used to charge the battery. Sanjana (2019) had developed a solar operated portable power Weeder figure 4. The Weeder consists of solar panel, dc motor, gearbox and blades. The developed Weeder was directly powered with a solar panel.

How to design weeding mechanism in solar power system?

It had been found that weeding operation involves the soil tool interaction. So, the design of weeding mechanism should consider both weed parameters and soil parameters. From study it had been found that the solar power system should consist of the solar panel, solar charge controller, battery backup, load controller as per designed parameters.

Do weeders involve soil tool interaction?

A review on different types of Weeders,solar powered machines and solar powered Weeders was carried out to provide proper knowledge about basic design considerations of weeding mechanism and solar powered system. It had been found that weeding operation involves the soil tool interaction.

How can solar energy help weeding machines?

The use of clean energy in weeding machines against petroleum fuels will cut the risk of environmental hazards and reduce dependency on petroleum fuels. By the use of solar energy,the problem of the unavailability of fuels will be resolved.

Can a solar Tiller remove weeds?

The solar tiller can also be used for removing weedswith lower depth adjustment than tillage depth. The tiller was developed by integrating the electric hub motor to rotate blades and motor. The power source used for operating Weeder was battery and solar photovoltaic system was used to charge the battery.
