Off grid solar battery storage. Off-grid (Also known as Grid independent) Solar power is a great solution for someone who doesn't have access to the grid. Using solar power with battery storage is a great way to provide off-grid power, we see it as another service that we offer so have dedicated a page to our off grid wing.

Battery storage lets you save your solar electricity to use when your panels aren't generating energy. This reduces the need to import and pay for electricity from the grid during peak times. For every unit of electricity stored in a battery and used at night, it will save you around 14p. Battery storage tends to cost around £5,000 to £8,000.
