

Photovoltaic support machinery price list

Why choose our photovoltaic module manufacturing equipment?

Our photovoltaic module manufacturing equipment are the result of our research and experience, but above all of our ongoing consultation with our customers. This means the product is specifically made-to-measure to their requests and needs, assuring a very flexible operating method when defining the order and during the production process.

What machines are used to manufacture solar panels?

In the case of Ecoprogetti's 20 and 40 MW/year solar panels manufacturing lines, the principal machines used are: solar stringers. For 60 MW/year solar panels manufacturing machines, the number of solar stringers rises to 3.

How to deliver a solar panel making machine or a production line?

To deliver a solar panel making machine or a solar panel production line that performs, we take special care to quality control in each stage: We are at your side in each stage of building your solar panel factory and production lines. Express your needs on solar panel producing, we will create your custom automation equipment.

What are the components of solar equipment?

Among the solar equipment, we also find several of the key components, such as solar panels, inverters, and racking systems. Solar panels are the components that harness and store the energy produced by the sun. Photovoltaic solar panels (PV), are composed of silicon semiconductors, which capture energy from the sun's rays.

What is solar energy equipment?

Solar energy equipment consists of the components that make up a solar energy system. The installation of the equipment allows for the harnessing of the sun's energy as well as its conversion into the electricity that is necessary for the home or business in question.

What equipment do you need to make solar panels?

Main machinery: Solar simulator. Accessories: Laboratory accessories for quality control. Setting a production line of solar panels is a task that requires know-how and experience.
