What is a solar walkway?

Our Solar Walkway is a smart data floor designed to promote renewable energy in the public domain. The floor is installed in urban environments to make the production of renewable energy visible. Everyday citizens can directly contribute to the energy transition by engaging with the Solar Walkway and benefit from its data and energy production.

Why should you choose a walkway for a photovoltaic system?

Walkway is fairly useful for a photovoltaic system, which not only makes mounting and maintenance easier, but also protect roofs during walking. Our walkway can be compatible with all our products: Rail, L-feet, clamp etc. To be more versatile, we offer multiple choice of length, width and coating thickness.

How much energy does a walkway solar panel generate?

The panels have an efficiency rating of two-thirds of regular PV panels. They generate up to 35Wp. Each module is 60 x 60 cm. The energy generated is sent back into the grid. 9 sensors on every Walkway module make the floor a powerful touchpad with endless possibilities.

Note that the removal of the cover board for ballasted PV systems is not recommended due to the shifting around of the arrays during wind events, and the resulting repetitive impact on the roof. Loose laying the slip sheet below a ballasted PV system runs the risk of water collecting between the slip sheet and the roof membrane.
