

Portable solar panels price

Where can I buy portable solar panels?

Portable solar panels at Argos. Use the sun's power to charge your devices on the go with portable solar panels. Order online today for fast home delivery.

How much does a portable solar panel cost?

This is directly related to a solar panel's size - that is, its surface area - as well as the efficiency of the PV cells it contains. In the UK, portable solar panels start with a power output of as little as 5W, which you can purchase for roughly £15 to £20 online, and go up to 400W, which cost around £670.

Are portable solar panels worth it?

Sure, portable solar panels lack the oomph to power an entire home's electricity needs - traditional roof-mounted (or even ground-mounted) solar panels are best for that purpose - but as a guilt-free way of generating renewable energy, portable solar panels will be an excellent addition to your next excursion.

What are portable solar panels?

Portable solar panels are meant to be moved around and are designed with that in mind. Many are made from flexible folding materials that allow you to roll or fold up the device and tuck it away without worrying much about damaging it. They are also lightweight and easy to carry.

How much does a solar panel cost?

The solar panel cost is tied to their power output and efficiency, with more powerful, more efficient panels costing more. In the UK, for instance, a 60W portable solar panel can cost as little as £160, while a 160W panel will be closer to £250, and a 220W panel will cost around £350.

Are portable solar panels good for mobile phones?

Since they must be compact to avoid inconveniencing users, portable solar panels are usually suitable for powering small devices rather than large ones. Many people use these panels to charge their mobile phones because these devices are extremely versatile and do not require very much power to keep charged.
