Is China a leader in solar PV?

This has solidified the country's position as an undisputed leader in the solar field. What's more, China proudly hosts the world's top ten suppliers of manufacturing equipment for solar PV. The numbers are nothing short of awe-inspiring: China's production of PV panels skyrocketed from 124.6 GW in 2020 to a staggering 288.7 GW by 2022.

How many solar panels were intended for international customers in 2022?

What's even more astonishing is that more than half of these panels were intended for international customers in 2022, a remarkable achievement considering the complex and unpredictable nature of the global solar market. This ascent in the solar sector is no mere coincidence.
