

Radio and Television Network WeChat Application

What is WeChat & how does it work?

While WeChat began as a messaging app comparable to WhatsApp, the app has since developed into a fully-fledged social media platform with features like Moments allowing users to post images and videos similar to the Stories feature on Snapchat and Instagram.

Is WeChat a free app?

The app is compatible with all major mobile operating systems, including iOS 9.0 and above and Android 4.4 and above. It's free to use but you can pay extra to access different sticker sets or make calls to international landlines via WeChat Out.

What is WeChat (Weixin)?

What is WeChat? WeChat (also known as Weixin in China) is a Chinese instant messaging app, social media platform and mobile payment service developed by Shenzhen-based tech company Tencent. As of March 2023, the app is the fifth most popular social media app worldwide, boasting more than 1.3 billion monthly active users (via Statista).

Does WeChat have encryption?

WeChat does not offer end-to-end encryption, a privacy feature that users expect from most messaging apps. The app has backdoors that allow third parties to read the messages you send and receive". This means you may want to think twice before using WeChat to host any private conversations or share sensitive data. Can you use WeChat in the UK?

What features does WeChat support?

WeChat supports text, voice messages, photos, videos, and location sharing. Contacts: A list of your contacts, including friends, official accounts, and group chats. Discover: Here, you can explore social features like Moments (similar to a Facebook timeline), Scan QR codes, Shake, and People Nearby to find other users.

What language does WeChat support?

Language: The app offers multiple language options, including English. You can set your preferred language under the "Me" tab > "Settings" > "General" > "Language". WeChat's interface is divided into four main sections: Chats, Contacts, Discover, and Me. Chats: This is where you can view and send messages to your contacts.
