Solar panels capture energy from daylight and turn it into electricity that can be used to power your home. Solar is a sustainable source of energy that doesn't rely on fossil fuels and produces low levels of carbon. The more panels you have, the more electricity you can generate and the more efficient your home can be.

You can use Solar Panels to generate green electricity from sunlight. Over 900,000 homes across the country already benefit from clean, affordable solar power. A Solar Photovoltaic (Solar PV) module absorbs and converts sunlight into electricity. They don't need direct sunlight to work - they can still generate some electricity on a cloudy day.

Who Should File: A person that owns an electric generating facility in Texas and is either a power generation company or a qualifying facility (as defined in PUCT Substantive Rule 25.5 (54)) and generates electricity intended to be sold at wholesale, must register as PGC.
