

Rio Tinto Western Australia Solar Farm

Will Ngarluma & Rio Tinto develop a solar farm in Australia?

Rio Tinto and Ngarluma Aboriginal Corporation (NAC) agreed to pursue the development of an 80MW solar farm in Australia, near Karratha, to supply renewable energy to the company's iron ore operations in Western Australia's Pilbara region.

Will Rio Tinto build a solar farm near Karratha?

Mining giant Rio Tinto plans to pursue the development of an 80 MW solar farm on Ngarluma country, near Karratha, to supply renewable energy to the company's iron ore operations in Western Australia's Pilbara region.

Does Rio Tinto have a solar farm?

REUTERS/David Gray/File Photo Purchase Licensing Rights July 15 (Reuters) - Australia's Rio Tinto (RIO.AX) said on Monday it has agreed to develop an 80 megawatt (MW) solar farm to facilitate the supply of renewable energy to its operations in Western Australia's Pilbara region.

What is Rio Tinto's 80 megawatt solar farm?

Reporting by Roushni Nair in Bengaluru; Editing by Nivedita Bhattacharjee Our Standards: The Thomson Reuters Trust Principles. Australia's Rio Tinto said on Monday it has agreed to develop an 80 megawatt (MW) solar farm to facilitate the supply of renewable energy to its operations in Western Australia's Pilbara region.

Will Ngarluma develop a solar farm near Karratha?

(Image: Supplied) Ngarluma Aboriginal Corporation will develop an 80MW solar farm near Karratha in Western Australia's vast Pilbara region to supply Rio Tinto's operations across the Pilbara with renewable energy.

What is Rio Tinto doing in Pilbara?

Rio Tinto kick starts \$3 billion renewable plan in Pilbara with two 100MW solar farms and 200MWh of battery storage.

Rio Tinto installed 100,000 solar panels beside the Gudai-Darri iron ore mine it built between 2019 and 2022; those panels provide about 65 per cent of the mine's energy needs.

Ngarluma Aboriginal Corporation will develop an 80MW solar farm near Karratha in Western Australia's vast Pilbara region to supply Rio Tinto's operations across the Pilbara with renewable energy. It is the first solar project ...

Rio Tinto on Wednesday announced a deal to buy power from a new solar farm in Queensland as it seeks to green its aluminum operations on the country's east coast and halve its direct and ...

Rio Tinto Western Australia Solar Farm

Two First Nations-backed solar projects have been cleared for construction in Western Australia's Pilbara, one that will help to power Rio Tinto's Chichester iron ore ...

Mining giant Rio Tinto and Ngarluma Aboriginal Corporation (NAC) will pursue the development of an 80MW solar farm on Ngarluma Country, near Karratha, to supply renewable energy to the company's iron ore operations in Western Australia's Pilbara region.. The solar farm is the first proposed project the Ngarluma people and Rio Tinto will pursue after a memorandum of ...

Global mining giant Rio Tinto has entered into a power purchase agreement (PPA) with European Energy Australia, aiming to drive the development of Australia's largest solar power project, the 1.1GW Upper Calliope Solar Farm, located near Gladstone.. This initiative aligns with Rio Tinto's commitment to halve its global Scope 1 & 2 carbon emissions by the end ...

MELBOURNE, Australia, January 23, 2024--Rio Tinto will drive development of Australia's largest solar power project near Gladstone, after agreeing to buy all electricity from the 1.1GW1 Upper ...

About the Weipa Solar Farm. The 1.7MW Weipa solar farm is located at Rio Tinto Aluminium's (RTA) bauxite mine and Weipa township in the Cape York Peninsula, Queensland. Developed by First Solar, the facility has been in operation since 2016. It feeds into the Weipa grid under a Power Purchase Agreement with RTA.

Rio Tinto has had a big week, with the major miner locking in plans to build two new solar farms in Australia and completing construction of a key solar power plant in Canada. Australia. Rio Tinto ...

Mining giant Rio Tinto plans to pursue the development of an 80 MW solar farm on Ngarluma country, near Karratha, to supply renewable energy to the company's iron ore ...

Koodaideri, 100 per cent owned by Rio Tinto, is located approximately 35 kilometres north-west of Rio Tinto's Yandicoogina mine site, and about 110 kilometres from the town of Newman. Funding for the solar plant and battery sits within Rio Tinto's existing guidance for sustaining capital expenditure for its iron ore business.

The 34 MW solar farm will eventually be connected to Rio Tinto's grid at the Gudai-Darri central substation via a 6km-long overhead powerline and fibre-optic link, which is not included in the NRW contract. Rio Tinto relies on solar ...

Resource-sector heavyweight Rio Tinto is planning to invest \$600 million (USD 402 million) building two new solar farms and battery energy storage systems in the Pilbara region of Western Australia as part of the ...
