

Small fishing boat with solar power

Is solar power a good idea for fishing boats?

The solar powered motor seems well-suited for the smaller under-10m inshore day-trip fishing boats that utilise static gear. With 2,742 under 10m vessels operating across the UK in 2022 (Seafish,2023),as well as aquaculture service vessels,solar power presents a potentially exciting solution.

Can I build my own solar powered boat?

Our Solar Electric Propulsion System (SEPS) packages can be supplied directly so that you or your boatbuilder can build your own solar powered electric widebeam,narrowboat or barge. We also offer installation and consultancy services. This website may use cookies and external scripts.

Why should you choose a solar electric boat?

Our solar electric boats offer quality you can feel. Our boats are put through stringent production and management processes,and this can be felt onboard. Because silent cruising requires a reliable boat. Our solar electric boats combine the pleasure of cruising with respect for the environment.

Are solar electric boats quieter than gas boats?

Solar electric boats are much quieter than traditional gas-powered boats. This is because electric motors produce less noise than gas engines,which means that you can enjoy a peaceful,quiet ride on the water. This is not only enjoyable for you and your passengers,but it is also less disruptive to wildlife and other boaters.

Why should you choose Thames solar electric boats?

Thames Solar Electric Boats is dedicated to creating eco-friendly vessels that let boaters live a renewable,self-sufficient lifestyle. Here's why living on a solar-powered boat is a choice worth considering. Are you ready to make your boating experience more sustainable,quieter,and cleaner?
