Solar panels. Solar-powered pond pumps either have a separate rectangular solar panel that sits up to five metres away from the pump at the poolside, or an integrated panel in the middle of a self-contained solar-powered floating fountain, which sits on the water surface.. The larger the panel, the more watts of solar panel energy it can create to power the pump.

Solar-powered water pumps are increasingly popular as a sustainable and cost-effective solution for well, irrigation, and livestock water needs. Solar pumps come in various sizes and types, from small 12V pumps for low gallons per minute requirements to larger systems running off 6-panel solar arrays for commercial agriculture.
