Types of Generators for Off-grid Solar Systems. There are two main types of generator, conventional generators and inverter generators. Conventional generators are those used in workshops, on boats and anywhere that portable energy is required. They are relatively cheap, readily available and easy to maintain.

Most units are fully assembled and ready to be used. The all-in-one mobile solar generators include ten solar panels, SMA inverters, a Kubota generator, two light towers and two 48v batteries, situated on a 17" double axel Carson trailer. The units can be towed anywhere to produce AC and 12-volt DC power.

Solar generators of all sizes can also be charged with portable solar panels, which connect to the battery via a standard solar cable. These panels typically range from 100 to 400 watts and can be ...

And don't let size fool you either -- this compact solar generator offers a huge 1400W output, 300W solar charge input, and EcoFlow app integration. Buy Now.
