Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.

How to mount solar modules on a roof?

Mounting diagram There are various possibilities for the arrangement of the mounting system and the modules on the roof. The most common option is to horizontally assemble type TF50+ carrier rails and arrange solar modules vertically. For this reason, any further mounting procedures describe such an arrangement.

Are solar racking systems UL/ANSI 2703 compliant?

Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703. This racking system may be used to ground and/or mount a PV module complying with UL 1703 only when the specific module has been evaluated for grounding and/or mounting in compliance with the included instructions.

How to install a balcony Solar System?
