Solar panels are made up of framing, wires, glass, and photovoltaic cells, while the photovoltaic cells themselves are the basic building blocks of solar panels. Photovoltaic cells are what make solar panels work. The photovoltaic cells take the sunlight and turn it into electricity that can be used to power your home or business.

While the ordinary layman may not know, there is a vast difference between a photovoltaic cell and solar panels. Photovoltaic cells make up the structure of a solar panel, but the two have very different functions for the entire solar array. Essentially photovoltaic cells convert sunlight into voltage. Then the solar panel takes that voltage ...
