LED lights offer incredible savings that pay for themselves in twelve months. We combed the market for the best possible options. Our technology lasts for more than 50,000 hours - that's over 15 years! Why choose solar energy? Solar ...

These lights collect solar energy and transform it into lighting--through a technology called the photovoltaic effect which is used in a solar panel. This effect collects solar energy throughout the day and stores it in a rechargeable gel-cell battery that can be used later in the evening when there is no sunlight.

The system incorporates a high-efficiency monocrystalline solar panel, an MPPT charge controller, and a long-life LiFePo4 battery assembly integrated into a slim, corrosion-resistant IP67 housing. Optional Iot Smart city technology and software integration is also standard on our larger Stealth II 120-23 versions. Solar Panel Street Lighting
