

Solar power lamps do not require drilling

Do you need an electrician to install solar lights?

All of the lights sold at The Solar Centre do not need an electrician to install them. This includes the Geo Lighting Kits which are like a mini solar panel array. Also, it won't cost you anything in terms of electricity because it'll be self-sufficient. This Evo 15 Solar PIR Utility Light packs out a big punch for a small light.

Are solar powered lights a good choice?

Solar-powered lights are a great lighting solution for your home, garden, or remote locations. They do not require a wired connection to a power source and have a long lifetime. Solar-powered lights do not require direct sunlight, and can work when located in partial shade, or even without direct sunlight.

Do solar-powered lights work if not in direct sunlight?

Another factor that allows solar-powered lights to work even when they're not in direct sunlight is the battery. The solar panels on the lights charge the battery during the day, and stored energy in the battery powers them at night.

Do led solar lights need a power supply?

LED solar lights do not need a fixed power supply. These use solar energy during the day to charge their integrated battery. For optimal charging, the solar lights must be placed in the garden so that the solar cell is not obscured by plants or other objects. Many variants have a ground spike and can be anchored into the ground.

Do solar lights need direct sunlight?

While direct sunlight is best for solar-powered lights, they do not require direct sunlight to generate electricity and can function even when they are in indirect sunlight or shade. This is because their solar panels are able to convert the energy from the sun into electricity, regardless of whether there is direct or indirect sunlight.

Can a garden light be operated without electricity?

To operate a garden or balcony light without electricity and wiring, the electrical energy must come from somewhere else. Wireless garden lights have an integrated rechargeable battery, which is charged either by a solar panel or a charger. Here you can find an overview of popular outdoor lights with good reviews for atmospheric garden lighting.
